OWC

Safely Move and Transport Logs with LogRite® Professional Tools

OWC | Offered by
Oregon Woodland Cooperative

OWC Members Receive Substantial Discounts on LogRite Tools

Since 1980, Oregon Woodland Cooperative (OWC) members have helped other members create and market products from the forest. Now a distributor for LogRite tools, OWC can offer these fine tools to our members at a substantial discount.

LogRite Tools LLC makes a variety of high-quality, aluminum-handled logging and woodworking tools that are stronger, lighter and safer to use than the traditional wood handle models. LogRite also manufactures the most ergonomic and useful tools for low impact forest operations with minimal ground disturbance, such as pruning, thinning and log skidding. All LogRite tools are designed to increase employee safety, reduce downtime and liability.

The largest LogRite Log Arches only require a 30–40 HP tractor. The arches can carry a 30' or longer log when using a Fetching Arch as the tag axle to pick up the tail.

Options for the BTS Hauler include wide tires or a Tow Tongue to pull the BTS with your stump grinder or ATV.

Log Arches Move Any Log Anywhere on Any Slope

LogRite Log Arches are indispensable tools for moving logs. These arches pick up the logs at their midpoints so that the logs are fully suspended. This results in clean logs, minimal ground disturbance, and less energy required to move that log. Another advantage of a fully suspended log is it allows you to back in and out of any area. LogRite offers two different styles of arches in six sizes. Small arches are designed to be used by hand while large forwarding arches are designed to move logs up to 6,000 pounds. A variety of accessories such as tow packages and slings are available to accomplish specific moving tasks.

The Best Ergonomic Hand Truck on the Market

The BTS Hauler is a 2-in-1 hand truck and brush cart unit that features a 1500-lb. load limit and 46 cubic feet of space. No tools are needed to convert the hand truck into the brush cart. The hand truck's ergonomic handle system allows you to lift logs, barrels or large and bulky load easily and comfortably.

All Terrain Dump Trailer

The LogRite Dump Trailer features a mechanical scissor lift mechanism that is easy to use and maintain and gives you constant control over the load. With 24 cf of cargo space, it is available in all steel construction or with wood sides and deck.

LogRite Cant Hooks and Peaveys

Set the Standard for Logging Hand Tools

Made of aircraft aluminum and powder coated blue, LogRite's handles are stronger, lighter and easier to see. The hooks are heat treated and zinc plated to last a lifetime. LogRite's unique hook geometry allows the hook to bite effortlessly every time. When determining the size tool to buy, you should consider the length of the handle and the diameter of the logs you wish to move.

Whether made of wood or steel, all four sides of the All Terrain Dump Trailer can be removed for easy access. A handy tool box is included under the carriage.

Hookaroons are great tools for safely extending your reach.

LogRite Offers a Wide Variety of Tools to Meet your Woodland Needs

This flyer provides a high-level overview of available LogRite equipment. Consult the LogRite website or full product brochure for other useful hand tools and accessories, including hookaroons, log scales, saw bucks, skidding tongs or pruning saws – all offered at a discount to OWC members.
